**CONTACT** oparch.net | (415) 474-6724 | 2148 Larkin Street, San Francisco, California 94109

**FIRM** Ogyrdziak Prillinger Architects (OPA) is a San Francisco-based design studio, focusing on progressive design that specializes in the inclusion of digital technologies to examine models of nature in architecture. Established in 2004, OPA has been globally recognized for projects that reflect a dense layering of architectural and technological issues. In the interest of broadening the range of design strategies, the office also sustains a commitment to formal and computational research.

Projects range in scale from institutions to private homes, as well as interior and object design. While originating as a response to specific requirements of site, program and client, each project evolves as an exploration of its own internal formal possibilities rather than reflecting a predetermined architectural style. As a result, the work is distinctive for its conceptual clarity and strong visual presence. Both partners attended Princeton University and have taught graduate design studios at the University of California, Berkeley and the Harvard University Graduate School of Design.

**EDUCATION LUKE OGRYDZIAK**

Princeton University, Masters in Architecture, 1995

Princeton University, Bachelor of Arts in Architecture, summa cum laude, 1992

**ZOE PRILLINGER**

Princeton University, Masters in Architecture, 1994

Princeton University, Bachelor of Arts in Architecture, magna cum laude, with Certificate in European Cultural Studies, 1992

**AWARDS**

**2013**

New York Architecture League
